Calgary Scientific Medical Group and Intuitive Imaging Informatics unveil a fully web-based PACS Advanced Visualization solution

Seattle WA, May 15, 2008 - Calgary Scientific Medical Group, a leading provider of user-friendly advanced visualization and analysis software for OEM integration, today unveiled a fully web-based thin client solution. The announcement was made at the annual meeting of the Society for Information Informatics Meeting (SIIM) in Seattle, Washington, May 15 – 18. The solution is being demonstrated in conjunction with partner Intuitive Imaging Informatics LLC and their ImageQube web-based PACS at booth #814-816.

The web server edition of ResolutionMD™ supports the increasing demand for access to high resolution CT and MRI studies without requiring dedicated visualization workstations. This true thin client approach allows radiologists and their colleagues to perform sophisticated visualizations via a web browser securely connected to the network or the Internet. When tightly integrated with Picture Archiving and Communications Systems (PACS), ResolutionMD provides an easy-to-use interface, making multiplanar reformatting (MPR), thick slabbing, volume rendering and other advanced image analysis tools widely accessible.

“Our customers are looking for seamless access to advanced visualization tools across their medical enterprise from the ImageQube PACS,” said Martin Pfaff, President and CEO of Intuitive Imaging Informatics, “Calgary Scientific’s new web server platform and their focus on easy-to-learn interfaces is the ideal combination for our customers.”

“We are pleased to announce our web server integration with Intuitive Imaging Informatics,” said Byron Osing, CEO of Calgary Scientific. “Intuitive Imaging is a very progressive partner that shares our vision of improving access to images by leveraging the web. Our continued innovations in web-delivery technologies and user-friendly application design provide a very cost-effective, zero-footprint client solution. We look forward to supporting Intuitive’s delivery of web-based advanced visualization solutions that are fully integrated with PACS.”

About Intuitive Imaging Informatics LLC

Intuitive Imaging Informatics is a privately held company and offers affordability, scalability and customization for clients. Intuitive Imaging’s innovative technologies are found in nearly 300 hospitals and outpatient imaging centers nationally and internationally. Intuitive offers a complete, integrated medical imaging solution comprised of the Rational Imaging PACS and the web-based ImageQube PACS, which has the unique ability to run on any operating system (Windows, Macintosh, Solaris or Linux). The Rational Imaging PACS and ImageQube are complete with FDA 510(k) clearance. For more information about Intuitive Imaging Informatics LLC, please visit the website www.intuitiveimaging.com.

About Calgary Scientific Medical Group

Calgary Scientific Medical Group focuses on commercializing advanced visualization technologies for use in the healthcare field. Our patented innovations in 3D and 4D visualization software will enhance the use of CT, MR, PET and ultrasound imaging, resulting in improved diagnosis, treatment and monitoring of serious illnesses such as cancer, heart disease, stroke and other life-threatening diseases. For more information about Calgary Scientific Medical Group, please visit the website www.calscimed.com.
